Duggan Professor in Public Administration Chair, Department of Public Policy and Management Sol Price School of Public Policy University of Southern California Topic: How to Think about Institutions, Behavior, and Governance - Highlights: Based on a new book project, Professor Tang will examine ways of thinking about institutions, behavior, and governance by raising several fundamental questions. By reviewing the rationales, recent research, and evolving answers to these questions, the lecture will help us understand some of the perennial challenges of building and sustaining good governance in China, the United States, and beyond. Professor Tang will also reflect on what he learned as a student at United College and how it has helped shape his intellectual development. Some of the questions addressed in the lectures include: 1. How to preserve liberty in the age of equality? 2. How to make informal rules/norms support good governance? 3. Is centralized government and decentralized administration possible? 4. How to develop enduring civic associations that are independent of particularistic social relationships? 5. How can recent advances in behavioral theory enhance our understanding of institutions and governance?

講題:
宏觀制度如何約制環境治理: 比較美國和中國
- - - - - - - - - - - - - -
重點:
鄧教授會透過對美國和中國環境管理體系的研究,分析宏觀制度如何約制環境治理的選擇。他將列舉兩國在水資源管理和空氣污染控制方面的例子,探討治理體系的根本差異如何影響各自解決環境問題的方法,並就兩個治理系統的相對優劣作剖析。 | 2022-23 Distinguished Visiting Scholar Lecture 2

Speaker:
Professor Shui Yan TANG
Frances R. and John J. Duggan Professor in Public Administration
Chair, Department of Public Policy and Management
Sol Price School of Public Policy
University of Southern California

Topic:
How Macro-Institutional Contexts Constrain Environmental Governance: Comparing the United States and China
- -
Highlights:
Professor Tang will examine how marco-institutional contexts constrain options for environmental governance by drawing on his research on the US and Chinese environmental management systems. Using examples in water resource management and air pollution control from both countries, he will explore how fundamental differences in the two governing systems affect their respective approaches to addressing environmental problems. The relative strengths and weaknesses of the two systems will also be examined. | |
