**Anti-pandemic Measures and Special Regulations in Student Hostels 2022-2023**

**A. Anti-pandemic Measures and Special Regulations**

Since student hostels have been resumed normal operation in 2022-2023, many students are living together in hostels with shared public facilities. To reduce the risk of virus transmission, all residents must pay attention to the anti-pandemic measures and follow the special regulations as below:

1. Residents must always wear a mask in communal areas.
2. Residents are only allowed to invite CUHK staff and students to enter the hostels from 11am to 11pm. Overnight is not permitted. Violators will face immediate expulsion from the hostels without refund of any kind.
3. Residents must also follow any anti-pandemic measures setup by Wardens until further notice. Those failing to comply may face immediate termination of residence. Further penalties may be meted out by the College Disciplinary Committee.
4. In the event that the pandemic worsens locally or globally, the College reserves the right to step up the preventive measures, including closing down some of the facilities, early termination of residence period or temporary closure of hostels.

**B. Arrangement for Confirmed Cases and their room-mates**

**1. Confirmed cases arrangement**

- The concerned resident should inform the College and warden immediately.
- The resident can choose to go back home or reside outside student hostels.
- If the resident chooses to stay in student hostel, he/she will be arranged to stay in an emergency room (when available) and use designated toilet and shower cubicle, please clean and disinfect after use.
- If the resident conducts rapid antigen tests (RAT) with negative results on two successive days, please inform resident tutor/warden, and he/she can go back to the original room.
- The resident is allowed to go out or attend classes.
- Please keep an eye on the health status. If the conditions are deteriorating, please seek medical advice as soon as possible.

**2. Room-mates of Confirmed Cases arrangement**

- The concerned resident can choose to go back home, reside outside student hostels or stay in the original room.
- Please pay attention to the health status all the time. If obvious symptoms develop, do RAT test and seek medical advice. If the test result is positive, please follow the same instructions of the arrangement of confirmed cases as above.

**C. Penalty**

All residents must pay attention to the above anti-pandemic measures and special regulations in UC hostels. Otherwise, a warning letter will be issued by warden. If a resident accumulates two warning letters, the resident will be expelled from hostel without refund of any kind. If the resident allows the visitor staying overnight, the resident will face immediate expulsion from the hostels without refund of any kind.
